

# SAPPHIRE Receipt

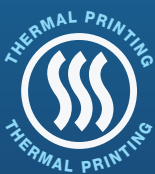

Compliment your Sapphire Terminal with the new 'bolt-on' thermal receipt printing system from MCS.

## Sapphire Receipt...

Compatible with terminals within the Sapphire range. Sapphire Receipt offers the perfect solution when hard-copy receipts for transactions are required - in particular for the resale of fuel in conjunction with our MID Approved Sapphire unit.

Also used at 'attended pumps', the Sapphire Receipt works seamlessly with preset authorization transactions, issuing a receipt when the preset amount of fuel has been delivered.

'Sapphire Receipt' uses the tried and tested thermal printer which removes the need for traditional (and less reliable) ink cartridges. The Sapphire Receipt unit also holds a substantial receipt reel of 280m (on each roll).
